

Door Furniture

Traditional Hardware Co. *The restoration specialists*

Traditional Hardware Co.

PRIVACIES Matching privacy adaptors are available for all door fittings and can be supplied with pre-drilled backplates, to order.
EURO PUNCH OUTS These are available in the full range of forged door furniture. They are punched to our own "Walsall" locks, but will also suit most other English locks. *Please note: products may vary slightly to those illustrated.*

Forged Brass Fittings

the restoration specialists

As with stamped fittings, the forging process requires the preparation of top and bottom dies that mesh together. Thick virgin brass rods are cut to size, heated to in excess of 600c degrees and then shaped in the dies by forging presses of between 200 and 400 ton.

The resulting product has a compressed molecular structure, which gives it greater strength, better surface finish and ensures consistency of shape.
